Chapter 1: Summary of Version 6.4 Updates

The updates listed below have been made to the Appendices Chapter Version 6.4 of the NGHP User Guide. As indicated on prior Section 111 NGHP Town Hall teleconferences, the Centers for Medicare & Medicaid Services (CMS) continue to review reporting requirements and will post any applicable updates in the form of revisions to Alerts and the user guide as necessary.

The SP55 error code (MSP Effective Date is invalid or less than the earliest beneficiary Part A or Part B Entitlement Date) has been added (see Claim Response File Error Code Resolution Table).

The following updates will become effective December 11, 2021:

In 2020, the Provide Accurate Information Directly Act (PAID Act) was passed to help Non-Group Health Plan (NGHP) Responsible Reporting Entities (RREs) better coordinate benefits by providing additional beneficiary enrollment information. With this Act, RREs will receive Part C (Medicare Advantage Plan) and Part D (Medicare prescription drug coverage) enrollment information for the past 3 years.

To support the PAID Act, the Query Response File will be updated to include: Contract Number, Contract Name, Plan Number, Coordination of Benefits (COB) Address, and Entitlement Dates for the last three years (up to 12 instances) of Part C and Part D coverage. The updates will also include the most recent Part A and Part B entitlement dates. The HIPAA Eligibility Wrapper Software (HEW) software will also be modified to extract the additional fields from the response file. Finally, process steps for installing and configuring the HEW software will be provided (see HEW Query Response File Record – Version 4.0.0 and Appendix K).

Chapter 2: Introduction

The Liability Insurance (including Self-Insurance), No-Fault Insurance, and Workers' Compensation User Guide has been written for use by all Section 111 liability insurance (including self-insurance), no-fault insurance, and workers' compensation Responsible Reporting Entities (RREs). The five chapters of the User Guide—referred to collectively as the “Section 111 NGHP User Guide”—provide information and instructions for the Medicare Secondary Payer (MSP) NGHP reporting requirements mandated by Section 111 of the Medicare, Medicaid and SCHIP Extension Act of 2007 (MMSEA) (P.L. 110-173).

This **Appendices Chapter** of the MMSEA Section 111 NGHP User Guide provides detailed information on Section 111 file format standards, and record and field specifications for the files used to report Section 111 claim information. The other four chapters of the NGHP User Guide: Introduction and Overview, Registration Procedures, Policy Guidance, and Technical Information should be referenced as needed for applicable guidance.

Please note that CMS will continue to update and to implement the Section 111 requirements. New versions of the Section 111 User Guide will be issued, when necessary, to document revised requirements and add clarity. At times, certain information will be released in the form of an Alert document. Any Alert dated subsequent to the date of the currently published user guide supersedes the applicable language in the user guide. All updated Section 111 policy and technical reporting requirements published in the form of an Alert will be incorporated into the next version of the user guide. RREs must refer to the current user guide and any subsequent Alerts for complete information on Section 111 reporting requirements.

All information pertinent to Section 111 reporting can be found on the various pages of the Section 111 website (<https://go.cms.gov/mirnghp>). Please check this site often for the latest version of this guide and for other important information such as the aforementioned Alerts. To be notified via email of updates to this Web page, click on the [Subscription Sign-up for Mandatory Insurer Reporting \(NGHP\) Web Page Update Notification](#) link found in the Related Links section of the web page and add your email address to the distribution list. When new information regarding mandatory insurer reporting for NGHPs is available, you will be notified. These announcements will also be posted to the NGHP **What's New** page. Additional information related to Section 111 can be found on the login page of the Section 111 Coordination of Benefits Secure Website (COBSW) at <https://www.cob.cms.hhs.gov/Section111/>.

Technical questions should be directed to your Electronic Data Interchange (EDI) Representative. Your EDI Representative contact information can be found in your profile report (received after registration has been completed).

Note: Section 3 (File Formats) apply to RREs using a file submission method.

Chapter 3: File Formats

3.1 General File Standards

Both the Claim Input and TIN Reference Files are transmitted in a flat, text, ASCII file format. The Connect:Direct file transmission method will convert files into EBCDIC. Query Files are transmitted using the ANSI X12 270/271 Entitlement Query transaction set. On request, the BCRC will supply each RRE free software to translate flat file formats to and from the X12 270/271. As described in the NGHP User Guide Technical Information Chapter IV, the Query File formats are the flat file input and output to the translator software supplied by the BCRC. The remainder of this section assumes the RRE will use that software. If you are using your own X12 translator, the necessary mapping is documented in an X12 [270/271 companion guide](#) that can be downloaded from the NGHP Use Guide page. Note that the BCRC will only accept files transmitted using the 5010A1 version of the X12 270/271 RREs will continue to be given at least 6 months advance notice of any future upgrades.

Mainframe and Windows PC/Server-based versions of the HEW software are available. You may download the Windows version of the HEW software after logging on to the Section 111 COBSW at <https://www.cob.cms.hhs.gov/Section111/>. You may request a copy of both the mainframe and Windows versions from your EDI Representative or by contacting the EDI Department at 646-458-6740. The HEW software is maintained free of charge by the BCRC. No source code will be provided.

With the exception of the X12 270/271, all input files submitted for Section 111 must be fixed width, flat, text files. All records in the file must be the same length, as specified in the file layouts. If the data submitted ends prior to the end of the specified record layout, the rest of the record must be completely filled or padded with spaces.

All data fields on the files are of a specified length and should be filled with the proper characters to match those lengths. No field delimiters, such as commas between fields, are to be used. A carriage return/line feed (CRLF) character is in the byte following the end of each record layout defined in this chapter of the NGHP User Guide (2221st byte of the line if the record is defined as 2220 bytes). When information is not supplied for a field, provide the default value per the specific field type (numeric and numeric date fields filled with zeroes; alphabetic, alphanumeric and “Reserved for Future Use” fields filled with spaces).

Each input file format contains at least three record types.

- Header Record—each file begins with a header record. Header records identify the type of file being submitted, and will contain your Section 111 RRE ID. (You will receive your RRE ID on your profile report after your registration for Section 111 is processed.)
- Detail Records—represent claim information where the injured party is a Medicare beneficiary, or query requests for individuals on the Query Input File.
- Trailer Record—each file always ends with a *trailer* record that marks the end of the file and contains summary information including counts of the detail records for validation purposes.

Each header record must have a corresponding trailer record. The file submission date supplied on the header record must match the date supplied on the corresponding file trailer record. Each trailer record must contain the proper count of detail records. **Do not include the header and trailer records in these counts.** If the trailer record contains invalid counts, your entire file will be rejected.

3.2 Data Format Standards

The following table defines the formatting standard for each data type found in the Section 111 files, both input and response. **These standards apply unless otherwise noted in specific file layouts.**

Table 3-1: Data Format Standards

DataType	Formatting Standard	Examples
Numeric	Zero through nine (0—9) Right justified. Padded with leading zeroes. Do not include decimal point. See individual field descriptions for any assumed decimal places. Default to all zeroes unless otherwise specified in the record layouts. Note: the last two positions of dollar amount fields reflect cents. For example, in an 11 byte numeric field specified as a dollar amount, an amount of 10,000 (ten thousand) dollars and no cents must be submitted as “0000100000.”	Numeric (5): “12345” Numeric (5): “00045”
Alphabetic	A through Z. Left justified. Non-populated bytes padded with spaces. Alphabetic characters sent in lower case will be converted and returned in upper case. Default to all spaces unless otherwise specified in the record layouts. Embedded hyphens (dashes), apostrophes and spaces will be accepted in alphabetic last name fields. First name fields may only contain letters and spaces.	Alpha (12): “TEST EXAMPLE” Alpha (12): “EXAMPLE” Alpha (12): “SMITH-JONES “ Alpha (12): “O’CONNOR”

DataType	Formatting Standard	Examples
Alphanumeric	<p>A through Z (all alpha) + 0 through 9 (all numeric) + special characters:</p> <p>Comma (,)</p> <p>Ampersand (&)</p> <p>Space ()</p> <p>Hyphen/Dash (-)</p> <p>Period (.)</p> <p>Single quote (‘)</p> <p>Colon (:)</p> <p>Semicolon (;)</p> <p>Number (#)</p> <p>Forward slash (/)</p> <p>At sign (@)</p> <p>Left justified</p> <p>Non-populated bytes padded with spaces</p> <p>Alphabetic characters sent in lower case will be converted and returned in upper case.</p> <p>Default to all spaces unless otherwise specified in the record layouts.</p> <p>Parentheses () are not accepted.</p>	<p>Text (8): “AB55823D”</p> <p>Text (8): “XX299Y”</p> <p>Text (18): “ADDRESS@DOMAIN.COM”</p> <p>Text (12): “ 800-555-1234”</p> <p>Text (12): “#34 “</p>
Alphanumeric Plus Parens	Same as above but including Parentheses ()	“Department Name (DN)”
Numeric Date	<p>Zero through nine (0—9) formatted as CCYYMMDD. No slashes or hyphens.</p> <p>Default to zeroes unless otherwise specified in the file layouts (no spaces are permitted).</p>	<p>A date of March 25, 2011 would be formatted as “20110325”</p> <p>Open ended date: “00000000”</p>
Reserved for Future Use	Populate with spaces. Fields defined with this field type may not be used by the RRE for any purpose. They must contain spaces.	-

Appendix E: HEW Query File Input and Response File Layouts

Section 111 Query Input File (ANSI X12 270/271 Entitlement Query HEW Flat File Input/Output Format)

Note: These file layouts are for use with the HIPAA Eligibility Wrapper (HEW) software supplied by the BCRC to process the ASC X12 270/271. They reflect the flat file input and output for the current version of the HEW software.

Mainframe and Windows PC/Server-based versions of the HEW software are available. You may download the latest Windows version of the HEW software after logging on to the Section 111 COBSW at <https://www.cob.cms.hhs.gov/Section111/>. You may request a copy of the mainframe version from your EDI Representative or by contacting the EDI Department at 646-458-6740. See Appendix K for detailed steps on how to install and configure the HEW software.

Note: When using the HEW software, RREs should select the “COB” processing format for the Section 111 output file.

If you choose to use your own ANSI X12 translator to create the ANSI X12 270 files for the Section 111 Query Input File and process the X12 271 response, please refer to the following link found on the NGHP page of the CMS website:

Appendix F: Disposition, Error and Compliance Flag Codes

Response File Disposition Codes

Table F-1: Response File Disposition Codes

Disposition Codes	Description
01	<p>Claim Response File: Record accepted by the BCRC as an “Add,” “Delete” or “Update” record. RRE has indicated ongoing responsibility for medicals.</p> <p>TIN Reference Response File: TIN Record accepted.</p> <p>HEW Query Response File: For queries, the individual was identified as a Medicare beneficiary based upon the information submitted.</p>
02	<p>Claim Response File: Record accepted by the BCRC as an “Add,” “Delete” or “Update” record. RRE has indicated no ongoing responsibility for medicals.</p>
03	<p>Claim Response File: Record was found to be error-free and the injured party was matched to a Medicare beneficiary, but the period of time reflected on the claim report did not overlap the beneficiary’s Medicare coverage dates.</p> <p>The injured party was identified as a Medicare beneficiary based upon the information submitted, but the beneficiary did not have Medicare coverage during the reported time period.</p> <p>For claims with no ongoing responsibility for medicals (no ORM), record does not need to be resubmitted unless subsequent TPOC Amounts must be reported.</p> <p>For claims with ongoing responsibility for medicals (ORM), RRE must continue to check the injured party’s Medicare status and report when the individual becomes a Medicare beneficiary until the ongoing responsibility ends. Monitoring of such individuals may cease before they become a Medicare beneficiary if the standard for ORM termination set forth in the “Special Exception” section of the NGHP User Guide Chapter IV regarding reporting termination of ORM is met.</p>
DP	<p>Claim Response and Query Response Files:</p> <p>Multiple Medicare beneficiary records were identified based upon the data submitted. The DP (duplicate) disposition code will be returned if the the last 5 digits of the SSN submitted on the claim or query input files, when combined with matching criteria (first initial of the first name; the first six characters of the last name; date of birth; and gender), return multiple records.</p> <p>In instances where the RRE receives the DP code, they are instructed to take the following actions to remain in compliance with MMSEA Section 111 reporting requirements:</p> <ol style="list-style-type: none"> 1. Verify that the SSN, name, gender, and date of birth were entered accurately and re-submit. 2. Enter the full 9-digit SSN (if available) and re-submit. <p>If the system is still unable to locate a distinct match after re-submission, contact the BCRC at 1-855-798-2627. The RRE should provide the claim information to the customer service representative to file a self-report.</p>
SP	<p>Claim Response File: Record not accepted by the BCRC due to errors in the data reported. Record returned with at least one error code (specific edits and associated error codes are described below). Record must be corrected and resubmitted on the next quarterly file submission, unless otherwise specified in the error description, or as instructed by your EDI Representative.</p>

Disposition Codes	Description
50	<p>Claim Response File: Record still being processed by CMS. Internal CMS use only. Record must be resubmitted on the next quarterly file submission. This disposition code will be returned infrequently. RREs should expect to receive a very low volume of this disposition code. Records in the file that completed processing will be returned with an applicable disposition code.</p>
51	<p>Individual was not identified as a Medicare Beneficiary.</p> <p>Claim Response File: For claims with no ongoing responsibility for medicals (no ORM), record does not need to be resubmitted if all information submitted was correct.</p> <p>For claims with ongoing responsibility for medicals (ORM), RRE must continue to check the injured party's Medicare status and report when he or she becomes a Medicare beneficiary until the ongoing responsibility ends. Monitoring of such individuals may cease before they become a Medicare beneficiary if the ORM is not subject to reopening or otherwise subject to an additional request for payment or if the standard for ORM termination set forth in the "Special Exception" section of the NGHP User Guide Chapter IV regarding reporting termination of ORM is met.</p> <p>HEW Query Response File: For queries, the individual was not identified as a Medicare beneficiary based upon the information submitted.</p> <p>Note: This disposition code will be returned on the claim and query response files if the RRE submits the SSN (i.e., the last 5 digits or full 9 digits of the SSN) on the input record and the information is not matched to a Medicare beneficiary. RREs will also receive this disposition code if neither the Medicare ID (HICN or MBI) nor SSN is submitted on the input record or if the SSN entered is not 5 or 9 digits. In this case, the RRE must obtain a valid Medicare ID or SSN and resubmit the record on the next file submission.</p>

Error Code Descriptions

In general, when you receive an error related to a Claim Input File Detail Record and/or a TIN Reference File Detail Record, the corrected record(s) needs to be resubmitted on your next Quarterly Claim Input File submission. If TIN Reference File records are not corrected, subsequently processed Claim Input File Detail Records with matching RRE TIN/Office Code will reject. Any Claim Input File Detail Record that rejects for TIN-related errors must be resubmitted with the corrected TIN Reference File Detail Record in order for it to correctly process.

Error codes are prefaced with two letters followed by two numbers. Error codes that begin with a “C” indicate that the error occurred in the Claim Input File. Error codes that begin with a “T” indicate that the error occurred in the TIN Reference File. See the table below:

Table F-3: Error Codes Descriptions

Error Codes beginning with	Relate to

Error Code Resolution Tables

The Error Code Resolution Tables (Claim Response and TIN Reference Response) provide information on the error codes that you may receive on your Section 111 response file(s). Each table identifies the record and field that caused the error, identifies whether or not the field is required, provides the record layout field descriptions and provides some possible causes of the error.

NOTE: If you receive an error code that is not listed in this table, or you are not able to use this table to resolve your error, contact your EDI Representative for additional assistance.

Attachment A – Definitions and Reporting Responsibilities

(Attachment A to the Supporting Statement for the MMSEA Section 111 Paperwork Reduction Act (PRA) Federal Register (FR) Notice published February 13, 2009.)

SUPPORTING DOCUMENT FOR PRA PACKAGE FOR MEDICARE SECONDARY PAYER REPORTING RESPONSIBILITIES FOR SECTION 111 OF THE MEDICARE, MEDICAID, AND SCHIP EXTENSION ACT OF 2007

Note: The second paragraph under Liability Self-Insurance was revised subsequent to the initial publication of this Attachment on August 1, 2008.

DEFINITIONS AND REPORTING RESPONSIBILITIES

GROUP HEALTH PLAN (GHP) ARRANGEMENTS (42 U.S.C. § 1395v(b)(7)) --

INSURER

For purposes of the reporting requirements at 42 U.S.C. § 1395y(b)(7), an insurer is an entity that, in return for the receipt of a premium, assumes the obligation to pay claims described in the insurance contract and assumes the financial risk associated with such payments. In instances where an insurer does not process GHP claims but has a third party administrator (TPA) that does, the TPA has the responsibility for the reporting requirements at 42 U.S.C. § 1395y(b)(7).

THIRD PARTY ADMINISTRATOR (TPA)

For purposes of the reporting requirements at 42 U.S.C. § 1395y(b)(7), a TPA is an entity that pays and/or adjudicates claims and may perform other administrative services on behalf of GHPs (as defined at 42 U.S.C. § 1395y(b)(1)(A)(v)), the plan sponsor(s) or the plan insurer. A TPA may perform these services for, amongst other entities, self-insured employers, unions, associations, and insurers/underwriters of such GHPs. If a GHP is self-funded and self-administered for certain purposes but also has a TPA as defined in this paragraph, the TPA has the responsibility for the reporting requirements at 42 U.S.C. § 1395y(b)(7).

USE OF AGENTS FOR PURPOSES OF THE REPORTING REQUIREMENTS AT 42 U.S.C. § 1395y(b)(7):

For purposes of the reporting requirements at 42 U.S.C. § 1395y(b)(7), agents may submit reports on behalf of :

- Insurers for GHPs
- TPAs for GHPs
- Employers with self-insured and self-administered GHPs

Accountability for submitting the reports in the manner and form stipulated by the Secretary and the accuracy of the submitted information continues to rest with each of the above-named entities.

The CMS will provide information on the format and method of identifying agents for reporting purposes.

LIABILITY INSURANCE (INCLUDING SELF-INSURANCE), NO-FAULT INSURANCE, AND WORKERS' COMPENSATION (42 U.S.C. § 1395y(b)(8))**INSURER**

For purposes of the reporting requirements for 42 U.S.C. § 1395y(b)(8), a liability insurer (except for self-insurance) or a no-fault insurer is an entity that, in return for the receipt of a premium, assumes the obligation to pay claims described in the insurance contract and assumes the financial risk associated with such payments. The insurer may or may not assume responsibility for claims processing; however, the insurer has the responsibility for the reporting requirements at 42 U.S.C. § 1395y(b)(8) regardless of whether it uses another entity for claim processing.

CLAIMANT:

For purposes of the reporting requirements at 42 U.S.C. § 1395y(b)(8), “claimant” includes: 1) an individual filing a claim directly against the applicable plan, 2) an individual filing a claim against an individual or entity insured or covered by the applicable plan, or 3) an individual whose illness, injury, incident, or accident is/was at issue in “1)” or “2).”

APPLICABLE PLAN:

For purposes of the reporting requirements at 42 U.S.C. § 1395y(b)(8), the “applicable plan” as defined in subsection (8)(F) has the responsibility for the reporting requirements at 42 U.S.C. § 1395y(b)(8). For workers' compensation information this would be the Federal agency, the State agency, or self-insured employer or the employer's insurer.

NO-FAULT INSURANCE:

Trade associations for liability insurance, no-fault insurance and workers' compensation have indicated that the industry's definition of no-fault insurance is narrower than CMS's definition. For purposes of the reporting requirements at 42 U.S.C. § 1395y(b)(8), the definition of no-fault insurance found at 42 C.F.R. § 411.50 is controlling.

LIABILITY SELF-INSURANCE:

42 U.S.C. § 1395y(b)(2)(A) provides that an entity that engages in a business, trade or profession shall be deemed to have a self-insured plan if it carries its own risk (whether by a failure to obtain insurance, or otherwise) in whole or in part. Self-insurance or deemed self-insurance can be demonstrated by a settlement, judgment, award, or other payment to satisfy an alleged claim (including any deductible or co-pay on a liability insurance, no-fault insurance, or workers' compensation law or plan) for a business, trade or profession. See also 42 C.F.R. § 411.50.

Where an entity engages in a business, trade, or profession, deductible amounts are self-insurance for MSP purposes. **However**, where the self-insurance in question is a deductible, and the insurer is responsible for Section 111 reporting with respect to the policy, it is responsible for reporting both the deductible and any amount in excess of the deductible.

WORKERS' COMPENSATION LAW OR PLAN

For purposes of the reporting requirements at 42 U.S.C. § 1395y(b)(8), a workers' compensation law or plan means a law or program administered by a State (defined to include commonwealths, territories and possessions of the United States) or the United States to provide compensation to workers for work-related injuries and/or illnesses. The term includes a similar compensation plan

established by an employer that is funded by such employer directly or indirectly through an insurer to provide compensation to a worker of such employer for a work-related injury or illness.

USE OF AGENTS FOR PURPOSES OF THE REPORTING REQUIREMENTS AT 42 U.S.C. § 1395y(b)(8):

Agents may submit reports on behalf of:

- Insurers for no-fault or liability insurance
- Self-insured entities for liability insurance
- Workers' compensation laws or plans

Accountability for submitting the reports in the manner and form stipulated by the Secretary and the accuracy of the submitted information continues to rest with each of the above-named entities.

TPAs of any type (including TPAs as defined for purposes of the reporting requirements at 42 § U.S.C. § 1395y(b)(7) for GHP arrangements) have no reporting responsibilities for purposes of the reporting requirements at 42 U.S.C. § 1395y(b)(8) for liability insurance (including self-insurance), no-fault insurance, or workers' compensation. Where an entity reports on behalf of another entity required to report under 42 U.S.C. § 1395y(b)(8), it is doing so as an agent of the second entity.

CMS will provide information on the format and method of identifying agents for reporting purposes.

Appendix I: Excluded ICD-10 and ICD-9 Diagnosis Codes

This list contains ICD-10 and corresponding ICD-9 diagnosis codes that are not accepted by CMS for Section 111 reporting and are to be excluded from all claim report records.

None of these excluded codes may be submitted in Field 15 Alleged Cause of Injury, Incident, or Illness or the ICD Diagnosis Code 1-19 (Fields 18-36) on the Claim Input File Detail Record. If an ICD-9 diagnosis code is submitted in Field 15, it must be a code starting with the letter “E” that is **not** on this list. If an ICD-10 diagnosis code is submitted in Field 15, it must be a code starting with the letter “V,” “W,” “X,” or “Y” that is **not** on this list. If an ICD-9 diagnosis code is submitted in the ICD Diagnosis Codes 1-19, it cannot start with the letter “E,” cannot start with the letter “V,” and it cannot be a code on this list. If an ICD-10 diagnosis code is submitted in the ICD Diagnosis Codes 1-19, it cannot start with the letter “V,” “W,” “X,” “Y,” or “Z,” and it cannot be a code on this list.

All ICD-10 codes beginning with “Z” and all ICD-9 Diagnosis Codes beginning with the letter “V” are considered inadmissible for Section 111 reporting and should be excluded from diagnosis code fields 18-36.

On add and update record submissions, ICD Diagnosis Codes submitted in Fields 18-36 must be valid, that is, the submitted ICD Diagnosis Code MUST:

- Exactly match an ICD-10 or ICD-9 diagnosis code that CMS has deemed to be valid;
- Be left justified and any remaining unused bytes filled with spaces to the right;
- Include any leading and trailing zeros only if they appear that way on the list of valid ICD diagnosis codes;
- Not include a decimal; and
- Cannot be one of the diagnosis codes found on the Excluded ICD-10/ICD-9 Codes list.

Excel and text files containing a list of Excluded ICD-10 and ICD-9 Diagnosis Codes may be downloaded from the Section 111 COBSW at <https://www.cob.cms.hhs.gov/Section111/> by clicking on the link found under the Reference Materials menu option of the Login page.

The latest release of HEW version 5.0.0 will be available to download on 09/13/21 and can be used for testing between **09/13/2021** and **12/10/2021**. After the testing period (12/10/21), the latest HEW version should be used for unwrapping production 271 files, and you should discontinue use of the previous version of the HEW software (version 4.0.0).

As part of the PAID Act, the HEW application is being modified to accept new information in an NGHP 271 X12 file, which will then convert and include the new data it in the fixed-length S111 Query Response flat file. In conjunction with these modifications, the latest HEW application is being offered as an independent installation from the existing HEW software. This will allow you to maintain a separate testing environment while preserving the production environment for everyday use within the indicated testing window.

COB Processing

During the test period, you can submit test query files (270) that will result in 271 responses according to the updated definition (see HEW Query Response File Record – Version 4.0.0 for details). Responses to production files will continue to be produced according to the current 271 definition.

HEW Translation (X12 271 to Flat File 271)

The following table illustrates the relationship between the version of the 271 X12 imported into the updated HEW application, the version of the software used to perform the translation, and the expected output.

Table K-1: HEW Translation

COB 271 X12 Layout (Current or PAID Act Version)	HEW Software Version Used (Current or HEW v5.0.0)	Unwrapped Result Short 271 = 300 bytes, Long 271 = 5608 bytes
Current 271	Current	Short 271
Current 271	HEW v5.0.0	Long 271
PAID Act 271	Current	Short 271*
PAID Act 271	HEW v5.0.0	Long 271

The following are additional notes if you plan to use both HEW software versions during the test period:

- When downloading the latest HEW software, be sure to specify a different (test) directory for the new version so that it does not interfere with an earlier (production) version.
- If this is being installed on a shared computer/server, you must install the application while logged in to the account that will be using it. This includes executing the application via the command line.

Changes for Version 5.0.0

- Prior versions of HEW only had one input/output directory for all the format types. In this release, the directories have been created separately (Figure K-8) so you can configure and the query file paths individually.
- The log file used to be overwritten every time HEW was run. With this version, the log file is never overwritten. New entries are appended to the end of the file.
- This version (not previous versions) can now be automated (see Command Line Process for details).

Installation

The following describes the steps for installing and configuring the latest HEW software on the Windows platform. For a detailed description of the HEW software see NGHP Chapter IV.

1. To download the program, log in to the Section 111 application at <https://www.cob.cms.hhs.gov/Section111/>
2. Select the **HEW Software Download** from the *Reference Materials* menu to download the .exe file to your desktop.
3. Click the HEW .exe file to begin the automatic installer, following the screen prompts (Figure K-1).

Note: It is important to select the correct install option (Figure K-2). If in doubt, select *Everyone*.

4. Click **Next** to confirm the installation (Figure K-3).
5. Click **Close** to exit (Figure K-4).

An icon for the HEW application is installed on your desktop and in the Windows menu (Figure K-5).

Changing Settings

From the *Settings* menu, you can change the defaults for the input and output directory paths, log type, and processing format.

- To change the destination of a selected directory, click an **Input Directory Path**, **Output Directory Path**, or **Log Directory** and then click the three-dot menu icon (...) to select a different folder location (Figure K-9).
- To change the processing format (i.e., S111/VDSA or COBA), double-click **Processing Format** under **Misc.** and select a different format from the drop-down menu (Figure K-10).
- To change the log type (Event Viewer, File System, or Both), double-click **Log Type** and select a different log type from the drop-down menu (Figure K-11).

Notes:

The directories can be located anywhere and mapped to any drive. However, if you plan to use the command line mode and you specify a network location, make sure the drive is mapped or available **before** executing the application.

If you select the log type *Event Viewer* or *Both* option, you will be prompted to verify that you would like to create a new Event Viewer source. Click **Yes** and follow the remaining screen prompts.

Running Reports

Once you have mapped your drives, and have configured your settings (or have accepted the defaults), you can run your queries any time. Clicking the **Run 271 Inbound** button, for example, will display the input file results and location corresponding to the settings specified in the *Settings* menu. To cancel the processing, click **Stop**.

Pre-Processing Input Files

For Inbound files, the input files are pre-processed to ensure the file is properly formatted (i.e., each line is exactly 80 characters). If errors are detected, processing stops and the issues found are listed (Figure K-13).

For files that complete processing successfully, the last line of the results includes the command line argument options that can be used to automate the process just completed (Figure K-14).

Figure K-13: Pre-Processing Errors (Example)

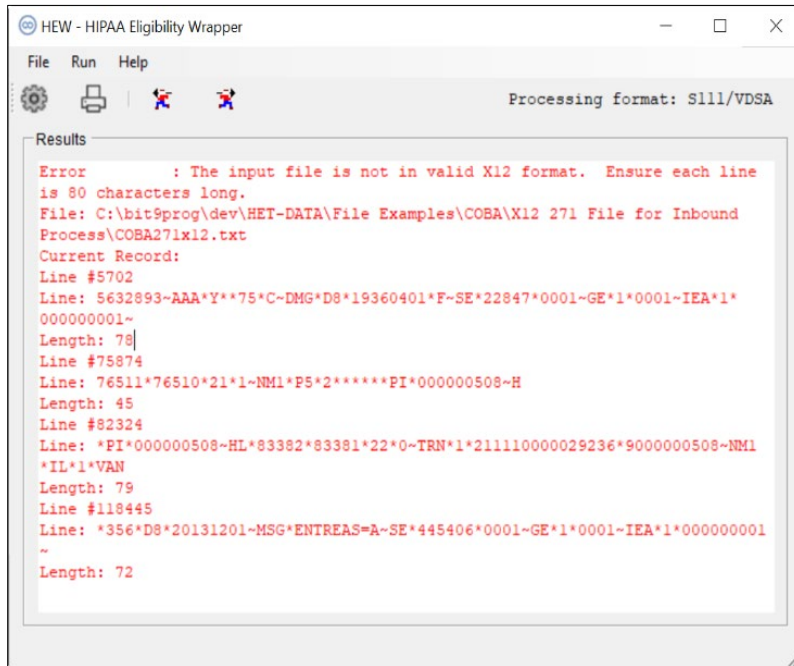

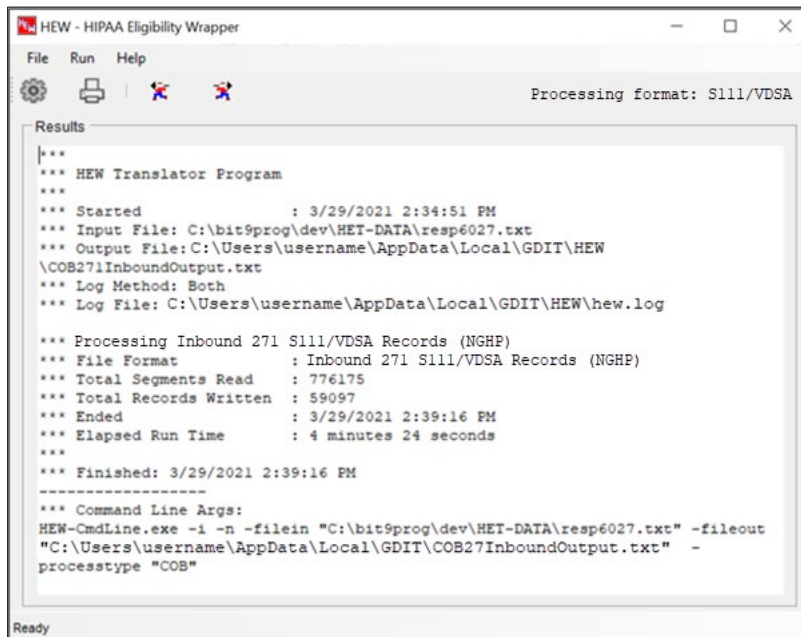

Figure K-14: Completed Inbound 271 S111/VDSA Query (Example)

Error Files

In addition to pre-processing inbound files to check formats, if other errors occur during processing, an error file is created. The name of the file is the same as the input with the extension of .ERR and is stored in a sub-directory of the input file location and is named ERRORS. The format of the file is JavaScript Object Notation (JSON) and contains 4 fields per error record.

- FIELD 1: “ErrId” - Unique numeric identifier (sequential) for each error record
- FIELD 2: “Segment” - The complete record segment in which the error occurred
- FIELD 3: “ErrSegment” - The part of the Segment in FIELD 2 that caused the error
- FIELD 4: “ErrMsg” - The error message that was generated during processing

If errors occur, the processing will continue but will not output a results file. Instead, the errors will be displayed in the results screen in red text (Figure K-16) and logged in the error file.

About Process Automation

For version 5.0.0, but not previous ones, the Command Line process can be automated by using the Windows(10) Task Scheduler. Keep the following points in mind when attempting to automate:

- By default, the data and error files are stored in the user's APPDATA directory:
C:\Users\username\AppData\Local\GDIT\HEW
- If the default file to process in the configuration file does not contain a path, then it looks in the default data directory listed above.
- Regardless of where you install the software, make sure that you are pointing to the HEW-CommandLine.exe file.

The user or process running the Command Line process must have **full rights** to the directories listed above. If the process runs from the application or user interface but not the command line, try running the Command Line process with administrative privileges. Right-click the Command Line file and select Run as administrator. If an error does occur while running it via the command line, any errors should be written to the log file located in the default directory listed above (Figure K-14). If the log file does not contain any errors, but the file was not processed, it may mean the account from which you are running the command line does not have read/write permission to that directory. You can always open a command prompt with administrative rights, navigate to the directory and type in: `hew.exe -on` at the command prompt to see if there are any messages.

Command Line Examples:

Appendix N: Previous Version Changes

Version 6.3

Chapter III

- To align with the terms and conditions regarding the acceptance of Ongoing Responsibility for Medicals (ORM) as described in Section 6.4, the language around periodic payments or one-time settlements to compensate for lost wages has been clarified (Section 6.5.1).

Chapters IV & V

- A new edit has been added and applied to NGHP *Claim Input File Detail Record* files when users submit a no-fault insurance claim where the policy limit is less than \$1000.00. The input files will be accepted but a new CP13 error will be returned on the response files to notify users to confirm the dollar amount submitted. Direct Data Entry (DDE) submitters will see a message on the *Insurance Information* page but will be able to proceed with data entry without correcting (Appendix F).
- Several Section 111 input record errors that would cause a record to reject will no longer cause the input records to be rejected. RREs, however, will continue to receive the errors on their response files, and they should correct and resubmit on their next quarterly file submission. The errors include: CC05, CC11, CC12, CC13, CC25, CC31, CC32, CC33, CC45, CC51, CC52, CC53, CC65, CC71, CC72, CC73, CI02, CI03, CI25, CP06, CP07, CP08, CP09, CP10, CP13 (new), CR11, CR12, CR13, CR14, CR31, CR32, CR33, CR 34, CR51, CR52, CR53, CR54, CR71, CR72, CR73, CR 74, CR91, CR92, CR93, CR94, and TN30 (Appendix F).
- Claim Input File Detail Records, and Direct Data Entry (DDE) records, submitted prior to the effective date of the injured party's entitlement to Medicare will be rejected and returned with a Disposition Code '03' instead of an SP31 error.

Chapter V

- A clarification has been added to the *No-Fault Insurance Limit* field (61), and to the CP11 error code, to indicate that you cannot add zeros as valid values if the Plan Insurance Type is "D" (No-Fault Insurance) for MSP submissions (Appendix A, Appendix F).

Version 6.2

To address situations where Responsible Report Entities (RREs) can identify future ORM termination dates based on terms of the insurance contract, Responsible Reporting Entities (RREs) can now enter a future Ongoing Responsibility for Medicals (ORM) Termination Date (Field 79) up to 75 years from the current date (Appendix A and Appendix F).

Retraction

In Version 6.1, we announced that several input errors will become "soft" errors starting April 5, 2021. However, CP03 will not become a soft edit. The *Office Code/Site ID* (Field 53), which triggers CP03, is used to identify correspondence addresses, and if incorrect, could result in mail being sent to the wrong place. Therefore this error will continue to reject the record (Appendix F).

Version 6.1

Starting April 5, 2021, the following changes will become effective:

- Several Section 111 input record errors that would cause a record to reject will become “soft” errors; that is, they will no longer cause the input records to be rejected. RREs, however, will continue to receive the errors on their response files, and they should correct and resubmit on their next quarterly file submission. The errors include: CC05, CC11, CC12, CC13, CC25, CC31, CC32, CC33, CC45, CC51, CC52, CC53, CC65, CC71, CC72, CC73, CI02, CI03, CI25, CP03, CP06, CP07, CP08, CP09, CP10, CP13 (new), CR11, CR12, CR13, CR14, CR31, CR32, CR33, CR 34, CR51, CR52, CR53, CR54, CR71, CR72, CR73, CR 74, CR91, CR92, CR93, CR94, and TN30 (Appendix F).
- A new “soft” edit will be added and applied to NGHP *Claim Input File Detail Record* files when users submit a no-fault insurance claim where the policy limit is less than \$1000.00. The input files will be accepted but a new CP13 error will be returned on the response files. Direct Data Entry (DDE) submitters will see a message on the *Insurance Information* page but will be able to proceed with data entry without correcting (Appendix F).
- Claim Input File Detail Records, and Direct Data Entry (DDE) records, submitted prior to the effective date of the injured party’s entitlement to Medicare will be rejected and returned with a Disposition Code ‘03’ instead of an SP31 error.

Version 6.0

Chapter III

Additional information has been added regarding the computation of Total Payment Obligation to Claimant (TPOC) amounts, and the language around the reporting of indemnity-only settlements or payments by RREs has been clarified.

Chapter V

The no-fault excluded ICD-10 diagnosis codes have been updated for FY 2021.

Version 5.9

Chapters III, IV, and V

- A reminder has been added that while the threshold for physical trauma-based liability insurance settlements remains at \$750, this threshold does not apply to non-trauma liability reporting for alleged ingestion, implantation, or exposure cases. Any settlement, regardless of amount, should be reported for these types of cases.
- The limit dollar amount that triggers a threshold error has been adjusted from \$99,999,999 to \$99,999,999.99. This error occurs any time the No-Fault Insurance Limit amount or the cumulative value of all reported TPOCs (detailed and auxiliary records) exceed this limit. Additionally, the No-Fault Insurance Limit field number has been corrected under “Exceptions.”
- When considering the requirements for ORM, remember, per current policy, that the dollar limit for No-Fault Insurance Limits (Field 61) represents a combined total of Med-Pay and PIP.
- The CR02 claim response file error code field number has been corrected.

- Several no-fault excluded ICD-10 codes have been removed from the *Excluded ICD-10 and ICD-9 Diagnosis Codes* table.

Version 5.8

Chapter III

Policy language regarding MSP recovery efforts has been updated.

Chapters III & IV

As of January 1, 2020, the threshold for physical trauma-based liability insurance settlements will remain at \$750. CMS will maintain the \$750 threshold for no-fault insurance and workers' compensation settlements, where the no-fault insurer or workers' compensation entity does not otherwise have ongoing responsibility for medicals.

Version 5.7

Chapter V

The excluded and no-fault excluded ICD-10 diagnosis codes have been updated for FY 2020 (Appendix I and Appendix J).

Version 5.6

Chapter II

Clarification added regarding submission of multiple Claim Input Files (Section 4.2.2).

Chapter IV & V

The retention period for downloading response files has been updated from 180 days to 60 days (Sections 10.3 and 10.4).

RREs can download the latest PC/server version of the HIPAA Eligibility Wrapper (HEW) software from the Section 111 MRA application, which is compatible with Windows 10. (**Note:** RREs using the mainframe version of the HEW may continue to request a copy of the latest HEW version from their EDI Representative.) (Sections 8.2 and 8.4, Appendix E)

Because file types have been restricted for uploads, RREs using the HTTPS file transmission method can only upload files with the file extension of .txt. Any other file type will generate an Invalid File error message (Sections 9.3 and 10.4).

Version 5.5

Chapter III

Beginning January 1, 2019, the threshold for liability insurance settlements, judgments, awards, or other payments ("settlements") will remain at \$750. CMS will maintain the \$750 threshold for no-fault insurance and workers' compensation settlements, where the no-fault insurer or workers' compensation entity does not otherwise have ongoing responsibility for medicals. (Section 6.4)

Chapter V

- If the Total Payment Obligation to Claimant (TPOC) is determined after the settlement date, Responsible Reporting Entities (RREs) are required to provide an actual or estimated date for the TPOC funding. To this end, the definitions for the Funding Delayed Beyond TPOC Start

Date fields (and related error code descriptions) have been updated (Table A-3, fields 82, 95, 98, 101, and 104).

- To resolve discrepancies, the excluded ICD-9 and ICD-10 tables in the appendices have been updated to match the excluded lists that are available through the Section 111 MRA application (Appendix I and J).
- To reduce the number of version and revision history pages, this guide now includes only information from the last four releases.

Version 5.4

Chapters I, II, & IV

- To meet Section 111 requirements, a Paperwork Reduction Act (PRA) disclosure statement has been added to this guide.
- The contact protocol for the Section 111 data exchange escalation process has been updated (Section 8.2).

Chapters IV & V

- To ensure updates are applied to recovery cases appropriately, RREs are asked to submit the policy number uniformly with a consistent format. When sending updates, enter the policy number exactly as it was entered on the original submission, whether zeros or a full policy number (Appendix A, Claim Input File, Field 54).
- Placement of decimals for the ICD-10 Excluded “Y” diagnosis codes has been corrected (Appendix I).
- The excluded and no-fault excluded ICD-10 diagnosis codes have been updated for 2019 (Appendix I and J).

Version 5.3

Per CMS, the Termination of Ongoing Responsibility for Medicals (ORM) Reporting has been updated.

ICD-10 exclusions have been updated for 2018 (Appendix I and Appendix J).

As required by Section 501 of the Medicare Access and CHIP (Children’s Health Insurance Program) Reauthorization Act (MACRA) of 2015, CMS must discontinue all Social Security Number (SSN)-based Medicare identifiers and distribute a new 11-byte Medicare Beneficiary Identifier (MBI)-based card to each Medicare beneficiary by April 2019. CMS has exempted all Medicare Secondary Payer (MSP) processes from exclusive use of the MBI. Therefore, Non-Group Health Plan (NGHP) RREs are permitted to continue to report for Section 111 mandatory insurer reporting using: full SSN, Health Insurance Claim Number (HICN), or MBI. All fields formerly labeled as “HICN” have been relabeled as “Medicare ID” and can accept either a HICN or the new MBI.

Additional Notes:

Medicare Identifier on Section 111 Response Files

The most current Medicare ID (HICN or MBI) will be returned in the Section 111 response files in the “Medicare ID” field. Consequently, if an RRE submits information with a HICN and the Medicare beneficiary has received their MBI, the MBI will be returned. Otherwise, the most

current HICN will be returned. RREs may submit subsequent Section 111 information for this Medicare beneficiary using either the HICN or MBI.

Medicare Identifier on Outgoing Correspondence

As part of the New Medicare Card Project changes, Benefits Coordination and Recovery Center (BCRC) and Commercial Repayment Center (CRC) issued correspondence will use the Medicare identifier that RREs most recently provided when creating or updating an Medicare Secondary Payer (MSP) record. Consequently, if the most recent information that was received used a HICN, all subsequent issued correspondence will be generated with the HICN as the Medicare ID. If the most recent information received used an MBI, all subsequent issued correspondence will be generated with the MBI as the Medicare ID.

Direct Data Entry (DDE) Users: Claim Searches

- Section 111 DDE users will be able to search for saved and submitted claims using the HICN or MBI.
- When searching for claims via the *Claim Listing* page, either the MBI or the HICN can be entered in the Medicare ID field. All claims that match for the Medicare beneficiary will display in the search results, regardless of Medicare identifier that was used to establish the claim.

Retiree Drug Subsidy (RDS) Unsolicited Response Files

- RDS Unsolicited Response Files will contain the HICN or MBI in the “Medicare ID” field, as sent by the RDS system.

General

- RREs will still be able to use a SSN to query via the Health Eligibility Wrapper (HEW) 270/271 query process. The most current Medicare identifier, either HICN or MBI will be returned in the “Medicare ID” field.

Other Changes

The contact protocol for the Section 111 data exchange escalation process has been updated (see Section 8.2).

Version 5.2

Chapters III, IV, V

For Section 111 reporting, the Centers for Medicare & Medicaid Services (CMS) has changed the minimum reportable Total Payment Obligation to the Claimant (TPOC) amounts for liability insurance (including self-insurance), no-fault insurance, and workers’ compensation claims, as follows:

- Liability is changing from \$1000 to \$750 for TPOC Dates of 1/1/2017 and subsequent.
- No-Fault is changing from \$0 to \$750 for TPOC Dates of 10/1/2016 and subsequent.
- Workers’ Compensation (WC) is changing from \$300 to \$750 for TPOC Dates of 10/1/2016 and subsequent.

TPOC amounts that exceed these thresholds must be reported. However, TPOC amounts less than the specified threshold may be reported and will be accepted. The logic for the CJ07 error

has been changed such that a TPOC of any amount will be accepted for all types of TPOCs, including liability TPOCs. The CJ07 error will continue to be returned for a liability, workers' compensation, or no-fault claim report where the ORM Indicator is set to "N" and the cumulative TPOC amount is zero.

See Appendix F, Table F-4 for CJ07 changes to the "Possible Cause" field.
