Overview & Services

Innovation Backed by Experience

Experienced & Focused Team

Medicare Secondary Payer (MSP) compliance is what we do. The IMPAXX team's focus is on assisting our customers in achieving optimal outcomes for their case resolutions using a multi-disciplinary approach, which combines our medical, benefit, and claims experience with knowledge of complex laws and regulations. Our roots stretch back to the beginnings of the MSP compliance industry, and our bi-coastal operations allow us to assist customers across the country and in all jurisdictions.

Comprehensive Approach

Our team of nurses, coding specialists, case managers, claim professionals, compliance analysts, and settlement consultants work towards better assessments of medical claims and faster compliance recommendations.

For workers' compensation, personal injury, and auto accident claims, IMPAXX offers a variety of Medicare Secondary Payer compliance solutions to meet customer's unique needs.

Solutions Customized to Meet Your Needs

Each settlement is unique, and some require a non-traditional approach to reach resolution. At IMPAXX, we continually work with our customers to tailor our offerings and create new solutions to help them reach their settlement goals while complying with applicable statutes and regulations.

Complete Suite of Products & Services

IMPAXX provides an innovative suite of Medicare Secondary Payer compliance services to assist customers.

Past Payments

Lien Resolution/Conditional Payments

Medicare may have made payments for the claimant pre-settlement and is seeking reimbursement. IMPAXX has a full suite of search, negotiation, and appeal services for Medicare Part A/B and Part C/D liens. We can also assist with Medicaid, Veterans Administration, and other types of liens.

Present Requirements

Mandatory Insurer Reporting

IMPAXX's 111 Reporter platform facilitates accurate and timely reporting while simplifying the reporting process. In our systems review, we provide a wellness check and evaluate current workflows and recent reporting data to identify and help minimize potential risks.

Future Considerations

Medical Allocations / MSAs

IMPAXX works with customers to design a future medical program that fits their specific caseload and risk tolerance. We have a full spectrum of allocation products from standard Medicare Set-Asides (submitted to CMS) to Non-Submit and Certified MSAs.
